

Luxury Seller Pre-Listing Checklist

Eastern Fort Lauderdale waterfront residences

Prepared by Mia Sanabria · (954) 540-0358 ·

Lauderdale, FL

A working checklist for owners preparing to list a Fort Lauderdale waterfront residence. The list mirrors the seller-side diligence Mia uses to structure private seller-side conversations before any photography or listing prep — current comparables, waterfront documentation, insurance dataroom, buyer-profile positioning. Each item is a deliverable to organize, not advice to follow.

Who this is for

Owners preparing to list a Fort Lauderdale waterfront residence who want to organize comparable sales, documentation, and positioning before any photography or open-house cycle.

How to use this document

Use this as the pre-listing dataroom checklist. Complete the comparables and documentation sections before scheduling photography. The pre-market decision tree at the end is a written decision, not an afterthought.

Comparable-sales cohort

- ☐ Identify the right comparable cohort: same canal, same block, similar lot profile, recent sales.
- ☐ Exclude generic neighborhood comps that miss the deepwater or finger-isle premium.
- ☐ Pull seller-side adjustments for renovations, dock conditions, and seawall age.
- ☐ Document Mia's comparable-sales review in writing so the listing strategy traces to

Waterfront documentation package

- ☐ Most recent boundary survey on file (with as-built features).
- ☐ Current dock and seawall inspection records.
- ☐ Permit history pulled from LauderBuild (open + closed).
- ☐ HOA architectural-review records, where applicable.
- ☐ Photographs of dock and seawall at multiple tide levels.

Insurance dataroom

What the buyer's insurance broker and lender will request — organized before listing reduces post-inspection renegotiation.

- ☐ Recent 4-point inspection (roof, electrical, plumbing, HVAC).
- ☐ Recent wind-mitigation inspection capturing applicable credits.
- ☐ Elevation certificate; confirm lowest finished floor elevation and datum reference.
- ☐ Prior-claim history (CLUE report) for the past 5-7 years where available.
- ☐ Renovation receipts and permits for any work that affects the insurance binding profile.

Inspection preparation

- ☐ Pre-listing inspection (optional but compresses the buyer's contingency window).
- ☐ Address any items likely to surface in a buyer's 4-point or general inspection.
- ☐ Confirm all open permits have been closed by the contractor of record.
- ☐ Document any post-inspection repairs with paid invoices and warranties where applicable.

Editorial photography and dock-up narrative

- ☐ Photography that captures the lot, the route to the inlet, the dock, and the lanai — not only the interiors.
- ☐ Confirm the listing copy carries the residence's specific identity (architectural era, canal context, lifestyle anchor).
- ☐ Prepare an open-house and broker-tour narrative tuned to a single buyer profile.
- ☐ Walk the photography contract with Mia before the photographer arrives so the brief is residence-specific.

Tour and showing strategy

- ☐ Showing windows tuned to the buyer profile (vessel buyers at sunset; hosting buyers at golden hour).
- ☐ Staging tuned to the architectural era — not generic.
- ☐ Confirm any pre-showing checklist with Mia before each tour cycle.
- ☐ Schedule a broker-tour day before any public open house to surface broker-network feedback.

Buyer-profile positioning

- ☐ Identify the single dominant buyer profile (yachting, in-town walkability, beach-corridor).
- ☐ Confirm listing copy, photography, and showing strategy align to that profile.
- ☐ Document the positioning rationale in writing so the strategy stays coherent if market conditions shift.

Quiet pre-market decision tree

A discrete decision to make in writing before any listing copy is finalized.

- ☐ Decide whether to allow a quiet pre-market period (Mia mentions the residence privately to brokers whose buyers fit).
- ☐ Set the time horizon for the pre-market window (commonly 2-6 weeks).
- ☐ Define what triggers public listing (buyer-pool exhaustion, calendar date, market shift).
- ☐ Confirm the pre-market option is consistent with any HOA or contractual disclosure obligations.

Seller next step

Mia coordinates the introductions to inspectors, marine contractors, photographers, and the title/closing roster.

- ☐ Request a confidential property-specific valuation.
- ☐ Schedule the listing brief — comps, positioning, photography, timeline.
- ☐ Decide on the pre-market period in writing before any listing copy goes out.

Documents to request

- ☐ Most recent boundary survey
- ☐ Current dock and seawall inspection records
- ☐ Permit history from LauderBuild (open + closed)
- ☐ HOA architectural-review records (if applicable)
- ☐ Recent 4-point and wind-mitigation inspections
- ☐ Elevation certificate
- ☐ Renovation receipts and contractor invoices
- ☐ Prior-claim history (CLUE report) for past 5-7 years

Specialists to involve

- Pre-listing inspector with waterfront-residence experience.
- Florida-licensed marine contractor (dock, seawall, lift inspection).
- Editorial photographer experienced with waterfront and dock-up narratives.
- Title insurance / closing attorney with Broward County jurisdiction.
- Florida-licensed insurance broker for buyer-side dataroom completeness.

Red flags / questions to ask

- Open permits on the renovation record.
- Seawall age exceeding the inspection interval.
- No recent 4-point or wind-mitigation inspection on file.
- Photography contract that is not residence-specific.
- Comparable cohort uses generic neighborhood comps instead of canal-specific ones.
